

Primal band saw

Minimal waste

With the primal band saw for primal cutting, the saw dust is further minimized, thus ensuring increased yield for your high valued primals. Furthermore the process is efficient, as just one operator is needed to align the carcasses in relation to a laser guide, ensuring the band saw performs precise cuts.

Hygiene

The primal band saw is in corrosion-resistant materials, approved for the food processing industry.

Options

- Adaption for separating the butt and picnic is possible
- An inclined version is available

Safety and legal requirements

The primal band saw is CE approved and designed in accordance with the EU and USDA regulations to meet the strictest demand on health and safety.

Why the primal band saw!

- Maximized yield
- Accurate and consistent cut
- No shattered bones
- Less down time due to high reliability and heavy duty design
- Fast and easy saw blade replacement
- No manual sorting after separation
- CIP system and easy to clean
- Food safety
- Reduced saw dust compared to a circular saw
- No water required during operation
