

## SERVICE SOLUTIONS // FWAL 250 ON-SITE SERVICES

# HOW TO HAVE OPTIMAL FLOW AND CLOSELY SEALED PRODUCTS ON YOUR FWAL 250

**Maximize your profit** by having your certified Frontmatec specialists assess whether the flank bearing still has the right clearance as well as calibrate and adjust the temperature of the welding wire ensuring optimal flow and closely sealed products for further fast and easy handling.

**Maintain high performance and optimal production flow** by using skilled and experienced technicians, who know what bearings to change and how to ensure the optimal condition and pressure of the air cylinder for automatic cut of the film.

**Stay prepared for the unexpected** by stocking critical spare parts for daily operation, such as Teflon-tape, welding wire and film for wrapping.
